

NEW!**KIENE**

DIESEL ACCESSORIES, INC.

**CC2068
King Pin Adapter**

The new **King Pin Adapter** adds even more functionality to the versatile **Clutch Caddy**. The king pin adapter allows the Clutch Caddy to carry the weight of everything attached to the knuckle on a steer axle. Just secure the adapter to the hub, remove the pin, and pull the entire knuckle assembly off the axle. Leave the hub bolted to the Clutch Caddy while the bushings are replaced and let the tool do the heavy lifting. It's a faster, safer way to replace king pins!

The King Pin Adapter was invented by ASE Master Tech Billy Heath of Augusta, GA

The Clutch Caddy and its adapters make jobs safer and more cost effective.

MADE IN THE U.S.A.
