Hub Oil Seal Puller

... REMOVES HUB OIL SEALS QUICKLY, AND ELIMINATES BEARING DAMAGE

Removing hub oil seals slows down routine brake jobs. Prying or driving them out is time consuming and bearings are often damaged in the process.

The Kiene K-1295 Hub Oil Sealer Puller solves these problems. It pulls oil seals fast, without damaging the bearings. The K-1295 saves time, money, bearings and frustration.

- Pulls Hub Seals from Steer Axle, Drive Axle and Trailer Seals.
- No need for prybars, crowsfoot, screwdrivers or punches.
- Works with all major manufacturers seals - Stemco, National, CR
- Heavy-Duty ductile iron construction.
- Leverage Arm delivers exceptional pulling power
- Even the most stubborn oil seals come off the hub cleanly, easily and fast.
- Saves time, every time.
- Pulls the entire seal, not just the rubber seal ring.

MADE IN THE U.S.A.
