## K-1356 16-1/2" Brake Drum Puller

**KIENE** wheel pullers (the *Wheel Grabber* and *Wheel Whiz*) are the proven, safe way to remove a seized wheel.

Now with the addition of the **K-1356 Brake Drum Puller**, both tools have become the safe way to remove a seized 16-1/2" brake drum.

Using a large hammer to release a frozen drum may cause damage to the drum *and* the mechanic.

The **K-1356 Brake Drum Puller** gives you the option of re-using both!

K-1356 Brake Drum Puller shown with K-1350 Wheel Grabber

Adjusting screws  
(two on top, one  
at the bottom)  
keep the puller  
centered on drum

Welded Steel  
Construction

Three chain assemblies  
provide even pulling  
force

Safety and Cost  
Savings from **KIENE**

MADE IN THE U.S.A.

**KIENE Equipment ...**  
*an investment in safety  
and productivity*
